

Quad-Power® 4

Service-free bandless V-belt

By using innovative minimal-stretch cord technology, Gates has designed the industry's first bandless zero-maintenance V-belt. Unlike conventional belts, the Quad-Power® 4 V-belt does not suffer from severe tension decay in the first hours after installation. So no run-in period nor any re-tensioning are required.

No re-tensioning means no machine or production downtime. The new Quad-Power® 4 service-free V-belts reduce downtime costs for maintenance and plant engineers.

BENEFITS

- › Service-free V-belt
- › Widest temperature range in the market: from -50°C to +130°C
- › Match system: all sizes meet Gates UNISET tolerances, they can be installed without matching
- › Energy efficiencies up to 98%
- › Latest EPDM rubber technology
- › Halogen-free belt
- › Perfect fit on standard ISO/DIN/RMA V-pulleys
- › Manufactured to DIN7753, ISO4184, RMA IP-22
- › Static conductive to ISO1813 / ATEX compliant
- › RoHS and REACH compliant

SECTIONS AND SIZE RANGE

SECTION	LENGTH (MM)
XPZ/3VX	600 - 3550
XPA	690 - 4000
XPB/5VX	1000 - 5070
XPC	1900 - 5000
